

KILLING INTERNAL / EXTERNAL PARASITES WITH DIATOMACEOUS EARTH

Treating internal parasites

When animal ingest food containing Diatomaceous Earth it immediately begins to clear the system, destroying intestinal parasites.

Offering Diatomaceous Earth for a minimum of 60 days is suggested for effective use add Diatomaceous Earth to the food long enough to affectively kill and eliminate any newly hatching eggs, or cycling of parasites through the lungs and back to the stomach. Diatomaceous Earth is simple, gentle and natural causing no toxic shock to your animals. Some other health benefits which take a few days to weeks to become apparent are; weight gain, better growth, stamina and shinier coats and eyes

Simply **add 1 scoop (30grams)** to every kilo of dry feed. (eg – Add 10 scoops to a 10kilo bag of dry feed) DE is completely tasteless so your animal wont notice any difference.

Treating external parasites

When lightly rubbed into their coats and dusted in your pet's area, Diatomaceous Earth is effective against Lice, Mites and Fleas on ALL Animals. Just rub gently into the pet's coat.

For Ear Mites simply rub a pinch of DE onto the skin on both sides of the ear flaps daily for a month or so to kill existing and newly hatched mites.

For ticks completely cover tick in DE, leave for ten mins if tick has not realeased re-apply the tick will eventually die and realease.
